# ADANSONIA DIGITATA ( BAOBAB TREE )

**Baobab Tree (Adansonia spp.)** is a remarkable, drought-resistant tree native to Africa, Madagascar, and parts of Australia. Known for its massive trunk that stores water and its iconic "upside-down" silhouette, the Baobab thrives in dry, arid climates. It can live for hundreds to thousands of years and produces fruit that is rich in vitamin C, calcium, and antioxidants. Besides its ecological importance, the Baobab is highly valued for landscaping in dry regions, offering unique aesthetics, resilience, and environmental benefits.
